

JOINERY REPAIRS THAT LAST

Guaranteed high quality repairs protect your maintenance budget now and for years to come

95% of rotted windows can be repaired economically, avoiding the cost and environmental impact of replacement. Most decay is in the bottom few centimetres of the frame and all that is needed is to repair those areas - giving an extended life to the whole window. **Typical repairs cost about 15-20% of a replacement window.**

Our downloadable Excel spreadsheet shows how easy it is to specify and estimate the cost of any repairs needed prior to redecoration.

The Repair Care system saves money today and, unlike traditional repairs, will still be working when you come to redecorate. It can even make the paint last longer.

Repair Care's flexible resins and putty replacement prevent water getting into the timber, protecting it from future decay. Our 1 hour curing resin is also ideal for reactive maintenance work.

We offer full support - from site visits to training the contractor to monitoring the repairs. **It's all part of the service.**
