Frequently Asked Questions

Please refer to the [product pages](#) and product [data sheets](#), or [contact us](#) for further information.

1. How 'green' is DRY FLEX®?
2. How much does a repair cost?
3. How long do repairs last?
4. Are the products guaranteed?
5. Can I use DRY FLEX® on listed or historic buildings?
6. Can you give me the name of a local recommended contractor?

1. How 'green' is DRY FLEX®?

Our system repairs only the affected area rather than the whole component so less material is used, saving on disposal, raw materials and transport.

2. How much does a repair cost?

The cost of repairs is significantly lower than replacement. The exact cost depends on several factors and our [Excel spreadsheet](#) gives a good indication of how to estimate prices. For complete assurance, our [Joinery Inspection Survey](#) provides a detailed report and accurate estimation of all costs involved in a project.

3. How long do repairs last?

With the correct preparation and application, DRY FLEX® repairs will last for the lifetime of the substrate. The repairs will also significantly extend redecoration cycles.

4. Are the products guaranteed?

Yes, our products are [guaranteed](#) for 10 years, subject to conditions.

5. Can I use DRY FLEX® on listed or historic buildings?

The DRY FLEX® system has been used extensively on many historic buildings. Please ask your local conservation officer to contact us if there are any queries.

6. Can you give me the name of a local recommended contractor?

Please [contact us](#) for details of a local trained specialist.
